

Where does hunger exist in Kansas?

Hunger exists in both rural and urban areas of Kansas. Many people who could benefit from food assistance do not know how to get it. By sharing information in this guide, communities and individuals can help improve nutrition and reduce hunger in Kansas.

Where else can I find help?

Communities, churches and non-profit organizations often provide other types of food assistance for ongoing and emergency needs. Contact community organizations for more information.

Food Resources for Kansans

No one in Kansas should go hungry. This guide provides information to help Kansans learn about food and meals for people of all ages, and for those in specific groups, such as children or the elderly. This guide summarizes what is available, who is assisted and where to get more information.

Why is it important to learn about food assistance and share that information with others?

Everyone can be healthier with improved nutrition. Good nutrition and eating habits have a positive effect on health, well-being, and ability to learn. However, many people are unable to purchase the variety of food needed for healthy nutrition.
