

## KVC Psychiatric Hospital services can help.

When a child's behavior becomes increasingly out of control and parents need somewhere to turn, there is hope for your child and help available through KVC Behavioral HealthCare's Psychiatric Hospital. Located on 75 beautiful wooded acres in Kansas City, Kansas, KVC's network of professionals provides family-centered treatment and healing, meeting the unique and individual needs of each child. KVC is here to provide professional help, support and recovery to your family during this difficult time.

KVC Behavioral HealthCare, Inc. is a private, not-for-profit organization providing medical and behavioral healthcare, social services and education to children and families. KVC is the most comprehensive behavioral healthcare network in the nation, providing an extensive continuum of care for at-risk children. KVC brings children and families together, one child at a time.

# KVC Psychiatric Hospital

for children and teens

## Residential Services support you and your child at KVC Behavioral HealthCare.

KVC operates two intensive treatment units for boys and girls ages 6-18. KVC's Residential Services will meet the individual treatment needs of children and adolescents who require a high level of structure in a friendly, nurturing environment. The therapeutic environment provides a

high degree of supervision while addressing individual needs, primarily psychiatric and behavioral issues. KVC's intensive treatment approach is family-

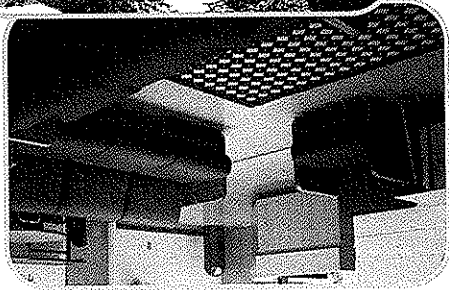

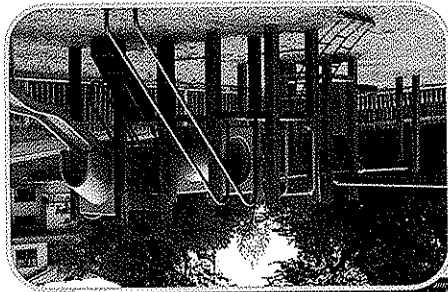

centered and works with the family's support system to help resolve issues. Children and adolescents enter treatment unable to cope and leave treatment with a feeling of security and self-control.

## An Inviting Facility in a Natural Setting

KVC's beautiful residential setting provides daily recreation and leisure activities on a 75-acre, wooded campus.

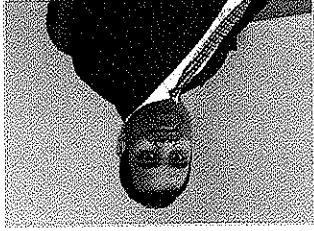

An indoor gym is available for basketball, volleyball and special events. Outdoor recreation includes a playground, basketball court, baseball field, fitness course and picnic areas.

## KVC professionals can make the difference.

The medical staff at KVC Residential Services is one of the finest in the area. Two psychiatrists, a pediatrician, child psychologists, nurses and therapists are available around the clock to focus on the needs of residents.

*KVC's medical director, Vishal Admu, M.D., has been with KVC since 1999.*
