Tonganoxie Nursing Center

A Nursing and Rehabilitation Center

The keys to Tonagnoxie Nursing Center's success are the strong relationships forged between our tightly-knit group of interesting and vital residents and compassionate and committed employees. It is through these relationships that we get to know you individually so that we can meet your health & rehabilitation needs.

Tonganoxie Nursing Center, is located centrally between Kansas City, Lawrence, and Leavenworth.

The staff members are committed to supporting the highest level of independence for those we serve. We believe that while someone is with us "this" is their home and we strive to make them feel as though they are home.

The following is an updated listing of Tonganoxie Nursing & Rehabilitation Center's room and board rates effective beginning on January 1, 2012

Room Type Description	Rate Effective January 1, 2012
Private (Single Bed) SNF	$186.00/Day
Semi-Private SNF	$166.00/Day

It is customary that certain ancillary and therapy services be charged separately from the room and board rate. Not all residents may need these services; however, for those that do it is appropriate to charge for them as they are delivered. These ancillary and therapy services may include, but are not limited to:

Physical Therapy	Occupational Therapy	Speech Therapy
Respiratory Therapy	Legend Drugs	OTC Drugs
Laboratory	Medical Supplies	Complex Medical Equipment
Incontinence Supplies	Durable Medical Equipment	Parenteral & Enteral Nutrition
Cable Television	Private Phone	Dry Cleaning
Barber/Beauty	Transportation	Radiology

The charge base for the above items is either the cost of the products, supplies, and services or a fee schedule established and published by the Centers for Medicare and Medicaid Services effective January 1, 2012. The facility maintains a charge master book detailing the established charge associated with each ancillary and therapy service. The charge master book is available for your inspection during regular business hours.

The charge base for the ancillary items listed below is based on a flat per diem fee per day. Fee per day for Gloves, Personal care items, and Over the Counter items apply to all residents. Fee per day for Incontinence, Dietary Supplements, and Cable TV/Phone apply on an "as used" basis.

Why Choose Us?

We are committed to clinical excellence and determined to continually raise the bar in home healthcare by setting new industry standards for quality care and personalized service. That's why many patients choose us every day for their home healthcare needs.

We Improve the Quality of Life

- *We treat you like family*
- *Quality support for loved ones*

- *Dynamic Services*
- *Responsive Staff*
- *Professional Care*

Our Services:

Skilled Nursing

Skilled nursing is provided by a Registered Nurse or Licensed Practical Nurse and includes coordinating the plan of care your physician has prescribed, monitoring vital signs, giving injections, and providing wound care, among other things.

Physical Therapy

The goal of physical therapy is to help you regain movement and strength. Our physical therapists will visit you in your home to help you perform daily activities and progress towards your physical goals.

Occupational Therapy

Occupational therapy is designed to help you regain your independence by performing daily activities by yourself. You may learn new ways to eat, put on clothes or comb your hair. Occupational therapy is sometimes ordered by a doctor without other skilled care.

Speech Pathology

After a stroke or accident, speech therapy can help you recover your swallowing and communication skills. Speech-Language Pathologists (SLP) specialize in the evaluation and treatment of swallowing, cognition/thinking skills and communication disorders to help you regain independence and improve your quality of life.

Respiratory Therapy

Respiratory care is an allied health specialty which provides a wide range of therapeutic and diagnostic services to patients with heart and lung disorders. Respiratory therapists are involved in the evaluation and monitoring of heart and lung function as well as giving treatment.

Home Health Aid

Home health aides support your nurse by providing assistance with bathing, dressing and other personal care.
